

FLUOROPLASTIC BALL VALVE

Q41F-10C SERIES

◆ APPLICATION

The product is designed for On/Off control of strong corrosive fluid, and widely used in industries such as petroleum, chemical, dying, pesticides, acid production and alkali production, etc. It is the current best choice for corrosion-proof equipment.

Q41F-10C SERIES

Nominal Diameter : (DN) 25~100mm
Nominal Pressure : (PN) 1Mpa
Operating Temperature : -20°C~+120°C
Material : Steel Liner F46

◆ FEATURE

Q41F-10C Series of Fluoroplastic Ball Valves have fluoroplastic liner, and its body is precise-cast with melt mold, and has high strength, smooth surface. A multi-function combination of fluoroplastic liner with metal appearance ensures the wetted parts works over range of -20°C to +120°C perfectly for long service life.
